- Free Initial Rack and Stack of Equipment

*\*Steadfast prides itself on working with our customers to find appropriate and affordable solutions. Contact Steadfast to find out what incentives we can offer to get you started.*

### Why Steadfast?

For 20 years, Steadfast has given customers the peace of mind that their critical data is safe, secure, and always available with industry-leading service, solutions, and hosting facilities.

- State-of-the-Art Data Centers in Chicago, IL and Edison, NJ
- Options for Per U, Half and Full Cabs, and Cages (**including 200kW cage space in our 350 E. Cermak location**)
- Experienced Systems Engineers On-site 24/7/365
- Average Support Response Time of 7.4 minutes
- 100% Power and Network Uptime SLA
- Complete Power, HVAC and Network Redundancy
- Network Access to All Major Backbone Providers and Over 100 Networks via Cross Connects
- 24/7 On-site Security and Surveillance

Complemented by a broad portfolio of cloud, managed storage and backup, disaster recovery, and managed security services, Steadfast delivers colocation and network connectivity options at cost-effective pricing so that you can run your own hardware in a professionally managed data center—without compromising control.

# OUR STATE-OF-ART DATA CENTER FACILITIES

## 350 E. Cermak - Chicago, IL

- 1.1 million sq. ft. building, making it one of the world's largest data centers
- Operated by Digital Realty, the world's largest data center operator
- Built to Tier III standards (Tier IV for power, Tier III for HVAC and other systems)
- Power provided by three separate substations
- Full 2N power redundancy, utility, UPS, power distribution, etc.
- Over 100 networks present on-site, if the network is in Chicago, they're at 350 E Cermak
- Other data centers in the building belong to major, publicly traded corporations such as BP, Fidelity Investments, CME Group, British Telecom, CenturyLink, Equinix, and TelX

Cermak's proximity to the Chicago Mercantile Exchange (CME) and Intercontinental Exchange (ICE) makes this an ideal choice for trading and financial customers that have a specific need to be in a carrier hotel, or for any customer that needs strong connectivity with low latency.

## 725 South Wells - Chicago, IL

- Completed in 2010
- N+1 redundancy
- Direct connectivity to 350 Cermak facility (over 8 Tbit/sec of redundant capacity) and Meet-Me-Room (MMR) connected to Zayo, Cogent, Verizon, CenturyLink, and more
- Up to 30% cheaper than 350 Cermak costs

725 S. Wells offers strong connectivity options in a downtown Chicago location for customers that have 100% power and network availability requirements, but need a lower price point.

## Edison, New Jersey

- Serves a large radius spanning from New York City to Philadelphia
- 830,000 total sq. ft facility (213,000 sq. ft. total data center space)
- Access to over 100 MW of power
- UTI Tier III designed certified
- Dual and diverse utility feeds into facility
- Backed by (8) 2.5 MW diesel generators
- (4) diverse fiber entry vaults with (48) 4" PVC conduits each

The Edison site is the largest commercially available modular data center with proximity from New York City to Philadelphia to allow for easy expansion.
