

Simplify Cloud Security and Compliance

THE PROBLEM: Without dedicated IT resources, organizations are becoming increasingly vulnerable to an ever-growing assortment of cyber-security attacks.

ALL-INCLUSIVE MANAGED SECURITY BUNDLES FOR COST-EFFECTIVE DATA PROTECTION AND COMPLIANCE

THE SOLUTION: Get a cost-effective and all-inclusive package of proven, standards-compliant security products, managed and maintained by us so you can focus on your core business.

Steadfast Sentinel Managed Security bundles are designed to support specific security or regulatory compliance needs for your cloud or dedicated server infrastructures. Cost-effectively deployed and managed by our IT experts, these Security Bundles remove your data protection management and maintenance tasks so that you can focus on your business and not your infrastructure.

WHAT MAKES SENTINEL MANAGED SECURITY BUNDLES UNIQUE?

Designed by Industry Experts
Designed and built in collaboration between teams of IT experts and security and compliance solutions providers.

On-Demand Consultation/IT Expertise
Includes consultation with IT engineers, delivering IT without the added costs and time of recruiting specialized staffing.

Compliance Defined Offerings
Remove guesswork by selecting the "right" bundle needed to meet specific audit and security assessments.

Industry-Leading Support
Includes 24/7 onsite support staff and support response time of 15 minutes or less for any troubleshooting issues.

Dedicated Security Surveillance
Includes dedicated surveillance resources and a 24/7 Security Operations Center (SOC) team that would be cost-prohibitive to staff on own.

Simplified Billing
Includes all required services in one low-cost monthly invoice, rather than procuring all services individually through multiple solution providers.

PCI DSS

HIPAA

FISMA

Security

CHOOSE THE SERVICE BUNDLE THAT IS RIGHT FOR YOU!

Each Steadfast Sentinel Managed Security bundle was designed to easily address different security and compliance needs required of cloud and dedicated server infrastructures. Each bundle contains a specifically designed collection of services—Managed Firewalls, Intrusion Detection/Prevention Systems, DDoS Protection, Vulnerability Scanning, Antivirus, Email Protection, Encrypted Backup, and more—that has been validated to assist with security and compliance needs.

To see all security services included in each Steadfast Sentinel Managed Security bundle, review our matrix sheet at www.steadfast.net/sentinel-matrix.

The **Steadfast Sentinel Security Core** bundle delivers foundational security measures, whether or not your company is under the stringent oversight of regulatory compliance audits, with a single, comprehensive collection of managed security services.

Visit www.steadfast.net/sentinel-core for more.

The **Steadfast Sentinel PCI DSS** bundle includes all the security tools necessary to operate, document, and demonstrate cardholder data environment (CDE) protection, vulnerability management, access control measures, and information security to demonstrate PCI DSS compliance in on-premise and cloud environments.

Visit www.steadfast.net/sentinel-pci for more

The **Steadfast Sentinel HIPAA** bundle includes tools necessary to ensure proper administration, physical, and technical safeguards as required to secure physical, network, and process security measures outlined by the Health Insurance Portability and Accountability Act (HIPAA).

Visit www.steadfast.net/sentinel-hipaa for more

The **Steadfast Sentinel FISMA** bundle gives you the resources needed to develop a “risk-based policy for cost-effective security” in accordance with the National Institute of Standards and Technology (NIST) to deliver various data security procedures outlined by the Federal Information Security Management Act of 2002 (FISMA).
